

INTRODUCTION

I am a Ph.D. student at KAIST, advised by Prof. Sung-Eui Yoon in the Scalable Graphics, Vision, & Robotics (SGVR) Lab. My research focuses on spatial intelligence for physical AI, spanning 3D scene representations, neural rendering, and robot policies. I am particularly interested in world models and generalist visuomotor policies that connect visual perception, geometric reasoning, and action. During my internship at NAVER LABS, I was fortunate to work with inspiring mentors, including Jaeseong Yoon, Soohyun Ryu, Hyunsu Kim, and Suyong Yeon.
